

Our Credentials & Experience

Love Your Workplace

We are Workplace Creations, an award winning design, build and project management company.

We create inspirational and effective environments that are designed and built for people to thrive.

About Us

We are a team with a collective passion for providing exceptional service whilst delivering incredible spaces. We care about the people we work with and are committed to creating positive experiences in everything we do.

Our process is one of detailed collaboration with every client, regardless of scale. Interpreting, creating, connecting.

Why, How, What – Our Key Principles

Why: Love Your Workplace

The purpose behind what we do

We believe people should love where they work - that's the heart of everything we do.

How: No Passion No Point

The mindset that drives us

Passion drives everything we do and that energy shows in every aspect.

What: Design. Build. Maintain

What we offer and deliver

We design spaces that inspire.
We build them with precision.
We maintain them with pride.

Our Values

Passion

Passion isn't just about the work, it's about the impact. We're driven by a genuine desire to create spaces that inspire, empower and transform. This passion fuels our creativity, pushing us to explore new ideas, ask challenging questions, and deliver exceptional results that exceed expectations. It's not just about completing a project, it's about crafting something extraordinary; because if there's no passion, there's no point!

Integrity

Integrity isn't just a word, it's the foundation of everything we do. We act with honesty, transparency, and fairness in every interaction, with clients, suppliers, and our team. This unwavering commitment to ethical practices builds trust, fosters collaboration, and sets the stage for exceptional results.

Persistence

Challenges are inevitable, but so are solutions. We're persistent problem-solvers, dedicated to finding creative and effective answers, no matter the size or complexity. We don't shy away from the tough questions, and we persevere until we find the best path forward. Our client's success is our motivation, and we're relentless in our pursuit of it.

Enthusiasm

We believe in the power of collective energy. Our enthusiasm isn't just about knowing we can help clients succeed, it's about feeling it. We're invested in their goals, bringing unwavering commitment and infectious passion to every project. We're not just consultants, we're partners, supporting them every step of the way.

What Our Clients Say

“

“We love our Workplace Creations design team! Thoughtful designs, attention to every detail, down to the smallest accessory. We are back for more creative design with Workplace Creations for our next London project.”

NORTHEASTERN UNIVERSITY LONDON

“

“Working with Workplace Creations over the years has always been a pleasure, both creatively and logistically. Collaborating with such a fantastic and professional team of dedicated individuals makes the process an easy and enjoyable experience.”

FORVIS MAZARS

“

“I am delighted with the end result and thank you all for your hard work and commitment. I understand what it takes and we should all be proud of how we have worked together on this. It just proves that it can be relatively painless when you work with the right people who are all passionate about what they do.”

WILLIAM GRANT & SONS

“

“I just wanted to say an overdue but massive thank you to all of the team involved in the Air Fit Out. It really is an amazing space, and everyone has been exceptionally complimentary and most importantly really happy to be here!”

ROBERT HALF

“

“It looks fantastic, especially the boardroom and meeting rooms. I love the aesthetic and of course the focus on inclusion. The transformation is incredible to see and we are absolutely thrilled with the result!”

ACCENTURE

“

“Thanks to Workplace Creations for a great job done on the fit out to our new offices. The team were brilliant, and we are very excited about the future in our office.”

Trusted By

Nobody's Child

White Lion Street, London

Project Overview

Workplace Creations delivered a new London workspace for Nobody's Child, spanning 16,500 sq ft across two floors and designed to support the brand's continued growth. The project brings the full creative journey together under one roof, with a dedicated photography studio, design studio and a range of flexible work settings that support both focus and collaboration. The space reflects the brand's identity, balancing expressive elements with a considered, functional layout. Materials, colour and detailing create an environment that feels both creative and purposeful, aligned with the pace and personality of the team. The result is a workplace that enhances how the brand creates, collaborates and evolves.

Policy Expert

L11 Salesforce Tower, 110 Bishopsgate, London

Project Overview

We delivered a 13,000 sq ft workplace expansion for Policy Expert in London, transforming Level 11 into a vibrant destination space while creating a seamless connection with their existing workplace on Level 2. Designed to support continued growth, the project increased desk capacity and introduced a variety of flexible meeting, training and breakout environments. At the heart of the space, a striking atrium breakout hub makes the most of the building's architectural features, creating a collaborative workplace that reflects the client's brand, culture and ambition for the future.

Frameworks

Talbot Works, London Bridge

Project Overview

We are currently delivering a brand-new managed workspace for Frameworks in the heart of London Bridge. This is a fast-paced, design-led project within a challenging, characterful building, featuring tight floorplates, shared amenity space, complex services and a high footfall context. It's exactly the kind of London stock where value is created through intelligent planning, bold aesthetic choices and rigorous coordination. We're taking this from concept design through to completion at pace, creating a flexible, high-impact workspace that will resonate with the target occupier profile for this location.

Grosvenor Street

Mayfair, London

Project Overview

We delivered a comprehensive CAT A transformation of 63 Grosvenor Street, a seven storey townhouse in the heart of Mayfair. The project carefully restored the building's heritage while upgrading the structure, services and finishes to meet modern workplace expectations. Original features were sensitively revitalised and paired with contemporary interventions, creating calm, refined interiors defined by soft natural tones, considered lighting and timeless finishes. Each floor has been designed to provide flexible workspace, allowing future occupiers to adapt the building to their own needs. The result is a carefully balanced workplace that respects the building's character while preparing it for its next chapter.

Avery Real Estate
11 Strand, London

Project Overview

At 11 Strand in central London, we delivered a 6,100 sq ft CAT A+ workspace that blends the warmth of a members' club with the functionality of a modern workplace. Designed for a long-term asset management client, the scheme layers deep greens, aged bronze, stained timber, and soft sheers to create a tactile, hospitality-inspired environment. Velvet lounge seating and ambient pendant lighting set an elevated tone, while carefully zoned spaces provide flexibility, from open-plan desks and relaxed breakout areas to a refined kitchen hub and private meeting rooms. Every element has been considered to support productivity while offering a warm, distinctive sense of place.

IFPI
L7, The Shard, London

Project Overview

Relocating to The Shard was a strategic move for IFPI. They needed a workplace that could support growth while reflecting their global presence. They needed a workplace that could increase capacity while strengthening collaboration. We reconfigured the floorplate to maximise performance and flexibility, introducing a central tea point to encourage connection and adding four meeting rooms to support focused collaboration. Capacity increased from 42 to 70 desks through intelligent space planning and carefully considered furniture selection. The result is a refined, future ready workplace that balances efficiency with experience and matches the ambition of its setting.

Alchemy Asset Management
21 Southampton Road, London

Project Overview

At 21 Southampton Row and Vernon & Sicilian, we delivered 18,689 sq ft of CAT A+ workspace designed for flexibility, functionality, and modern ways of working. The scheme includes a flexible boardroom with a folding wall, multiple meeting rooms, a welcoming reception area, and a teapoint hub for informal interaction. Feature bespoke joinery with concealed power and AV integrates seamlessly throughout, while focus booths, collaboration areas, and agile working spaces support a variety of work styles. Dressed spaces with carefully selected furniture, fixtures, and fittings complete the environment, creating a workplace that is both practical and visually refined.

Logistics UK Tunbridge Wells

Project Overview

We delivered a 13,500 sq ft CAT B fit out for Logistics UK's regional headquarters, creating a bright and contemporary workplace designed to encourage greater collaboration and office attendance. Inspired by residential design, the space combines natural materials, soft finishes and flexible work settings to support new ways of working. Despite navigating an evolving CAT A programme and a tight 10 week timeline, we worked closely with the client to deliver a workspace that reflects their growth and ambition, resulting in their highest levels of staff attendance to date.

Robert Half & Protiviti
L9, The Shard, London

Project Overview

As part of our continued partnership with a long-standing global recruitment agency client, we were appointed to deliver their new London HQ at The Shard. The project involved the full refurbishment of the 9th floor, transforming the space into a sophisticated workplace designed for productivity, collaboration and innovation. Our brief was to create an environment that balanced functionality and brand identity while aligning with the client's global design guidelines. The result is a contemporary, high-performing office that reflects their culture and supports the way their teams work today. Delivered within a live building environment and under the strict protocols of one of London's most iconic landmarks, we completed the works on time and within budget.

Tradition
Salesforce Tower, 110 Bishopsgate, London

Project Overview

This three-floor CAT B fit out, completed in September 2025, delivered a future-ready workplace through significant mechanical and electrical upgrades seamlessly integrated with the landlord's systems. Power infrastructure was enhanced across all levels to support long-term occupancy needs, while structural works introduced a striking spiral staircase linking levels 8, 9 and 10. Delivered under a design and build procurement model, the project benefited from an accelerated programme and tightly coordinated design process. Full compliance with Salesforce Tower's technical and operational standards was maintained, and sustainability was prioritised with specification and implementation aligned to achieve BREEAM Excellent certification.

Cherwell District Council

Castle Quay Shopping Centre, Banbury

Project Overview

Workplace Creations successfully delivered a 28,000 sq ft fit out for Cherwell District Council at Castle Quay Shopping Centre in Banbury. The project involved the transformation of the former BHS and Gap retail units into a modern, functional and sustainable workplace, creating a new central hub for the council's operations. Delivered within a live shopping centre environment, the works were carefully planned and managed to minimise disruption to retailers and the public throughout the programme. The completed space now provides an accessible, efficient and future ready working environment that supports both council teams and the wider regeneration of Banbury town centre.

ESP Utilities
Leatherhead, Surrey

Project Overview

ESP Utilities aimed to create a vibrant new workspace that would support team growth and foster collaboration. Inspired by a fresh, future-focused vision, the design introduces bold architectural lines and natural textures to bring people together in a welcoming, purposeful environment. Social zones, including a central café-style kitchen, are positioned to encourage connection, while acoustic meeting rooms and adaptable workstations support focused, flexible working. A warm, tactile material palette softens the space, with subtle contrasts and thoughtful detailing adding richness throughout. The result is a confident, people-centred office that balances energy with efficiency.

Forvis Mazars Bristol

Project Overview

As part of Forvis Mazars' regional growth strategy, the team in Bristol has moved into a newly upgraded workspace designed to meet the evolving needs of their people. From formal meeting rooms and quiet zones to relaxed collaboration areas, the new space encourages flexibility, productivity, and connection. Bold yet inspiring colours bring energy and character to the environment, reflecting the firm's dynamic culture. This project builds on the momentum of the recently completed Edinburgh office and continues the rollout of Forvis Mazars' global design standard, delivering consistency, innovation, and quality across their locations.

Northeastern University London

L7 & L8, One Portsoken, London

Project Overview

We helped transform Levels 7 and 8 of One Portsoken into a vibrant new campus for Northeastern University London, delivering a comprehensive furniture and environmental graphics package as part of our wider interior design scheme. Designed around the student experience, the project combined bespoke graphics, intuitive wayfinding, manifestation and carefully selected furniture solutions to create a welcoming and easy to navigate environment. The result is a campus that strengthens identity, supports collaboration and provides an inspiring setting for learning, connection and growth.

London Prosthetics Centre Chessington

Project Overview

This relocation from LPC's Kingston site brings together clinical, office, and manufacturing spaces in a single, purpose-built facility designed entirely with the patient in mind. The new environment features state-of-the-art clinical areas, a dedicated rehabilitation studio, a prosthetics workshop, silicone room, and a fully fitted office space with comprehensive amenities. Carefully planned to enhance patient outcomes, streamline workflows, and foster collaboration, the new facility supports LPC's continued innovation in prosthetic care.

16,000 16 2025

Size (sq ft) Duration (weeks) Completed

Exxon Mobil London, UK

Project Overview

The client aimed to streamline their primary trading centre while enhancing staff retention. Drawing inspiration from local architecture and landmarks like the Tate Modern, the design employed bold angles and sleek lines for a contemporary workspace. Efficiency was prioritised with maximised meeting areas to encourage collaboration. A calming material palette, featuring warm timbers and soft lighting, fostered a cohesive atmosphere. Neutral colours with carefully selected accents added richness. The design aimed to marry functionality with aesthetic appeal, creating a visually striking and productive environment.

LaSalle Investment Management Greycoat Stores, Victoria

Project Overview

Our team successfully delivered a two-floor CAT A+ fit-out project for LaSalle Investment Management at the historic Greycoat Stores in Victoria. The project involved the transformation of 2,055 sq ft on the Upper Ground floor and 10,818 sq ft on the Fourth floor. By preserving and enhancing the building's original features, such as exposed brickwork and steel beams, we created inspiring and functional workspaces that celebrate the building's rich heritage. This rapid 10-week project contributed to the overall revitalisation of the 70,000 sq ft development, setting a new standard for modern, plug and play workspaces in Victoria.

12,900 **10** **2024**

William Grant & Sons
The Old Court House, Richmond

Project Overview

We were appointed by William Grant & Sons to undertake a comprehensive refurbishment of the 7,000 sq ft ground floor of their historic headquarters at The Old Court House in Richmond. The project involved a complete strip-out and refurbishment of the space, including upgrades to electrical, plumbing, and mechanical systems. The transformed space provides a modern and inspiring environment for the global spirits company, while preserving the building's historic character.

7,000 10 2024

HarbourVest Partners

Air Street, London

Project Overview

HarbourVest Partners' new space at 20 Air Street reflects their existing brand – smart, refined, and elegant. The design incorporates a bespoke reception, a fully-flexible client suite with folding walls, and increased work capacity through agile offices and workstations. Day 2 expansion desking allows for future growth, while a stylish teapoint, event space, and staff wellbeing areas prioritise employee comfort.

27,000 30 2024

Size (sq ft) Duration (weeks) Completed

Accenture
Apsley House, Leeds

Project Overview

Our team transformed Accenture's 12,900 sq ft office space at Apsley House, Leeds within a 9-week timeframe. The design drew inspiration from Leeds' heritage, incorporating industrial style finishes throughout. Feature lighting, curved details, and warm colours were implemented to create a welcoming atmosphere, with a focus on enhancing key areas like the reception, teapoint, and events space to ensure a cohesive feel for the entire office.

Building Meaningful Relationships

We have developed many long standing client relationships over 23 years of business as a result of our consultative approach, attention to detail and best in industry client experience.

Accenture

We are proud to have supported Accenture since 2012. Over this time our relationship, as well as scope of work, has grown in stature and we are delighted to now be considered as an Accenture trusted partner for various service contracts across the UK and Ireland. Our current service agreements include Strategic Space Planning across the UK portfolio, Furniture specification & procurement, and small works contracts up to £1m value.

Northeastern University

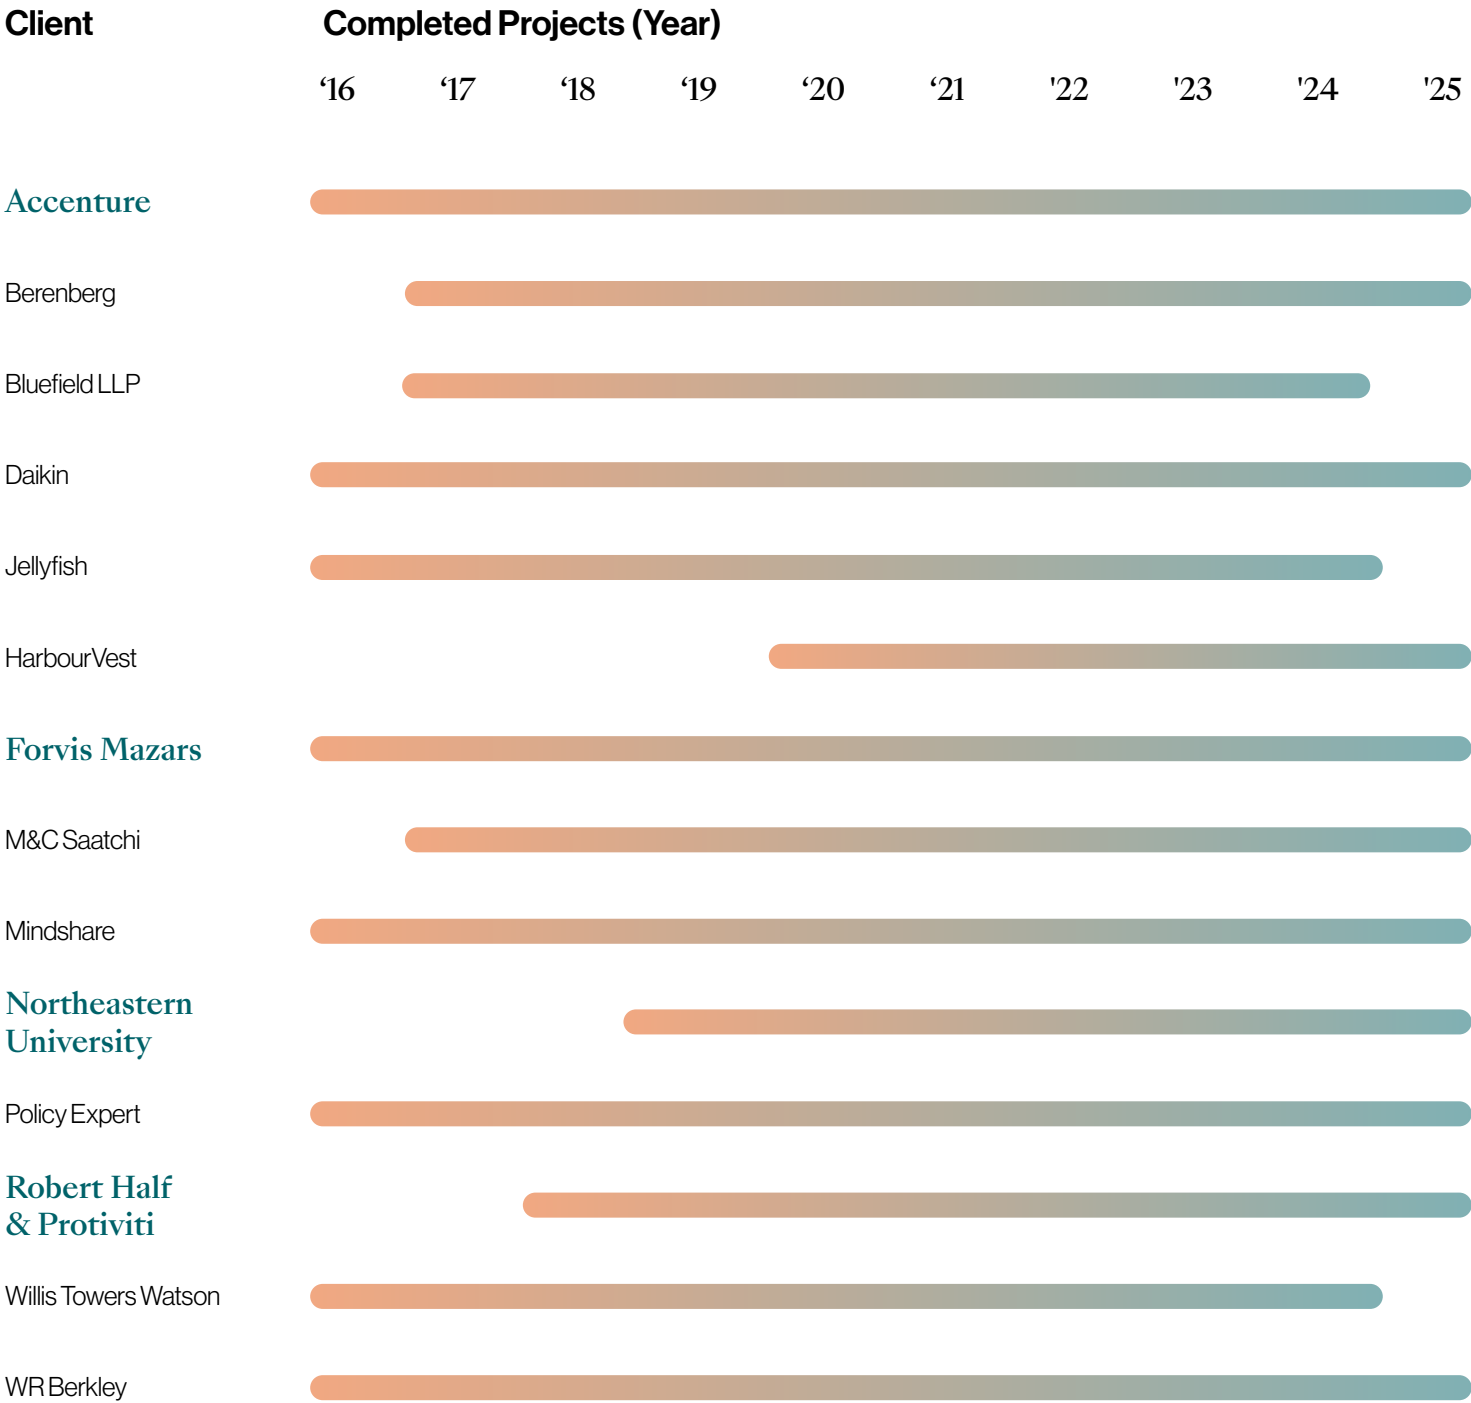

We are proud of our longstanding partnership with Northeastern University London, a collaboration instrumental in establishing their vibrant London presence. Since 2020, we have successfully delivered over £14 million of work across six projects, encompassing more than 80,000 square feet. Our collaboration has deepened to the point where we are trusted guardians of the Northeastern University London design standards, as we continue to support their expansion in the UK.

Forvis Mazars

We first partnered with Forvis Mazars when we completed the full design and build of their Bristol offices. We went on to work together on projects across their regional offices including Poole, Sutton and Milton Keynes, and the full CAT B design and build of their UK Head Office in Tower Bridge House, London. Most recently we have rolled out their new office design scheme, including the Mixology North 23 finalist, Forvis Mazars Edinburgh, which achieved BREEAM Excellent rating.

Robert Half & Protiviti

Our partnership with Robert Half & Protiviti began in 2019 with the successful delivery of the Protiviti Innovation Center. This high-tech collaboration suite in The Shard, linked to offices in New York and Boston, marked the start of our ongoing support for their UK portfolio. This includes the recent relocation of their UK headquarters to the cutting-edge AIR Building in Solihull in 2024, with several significant projects planned for 2025.

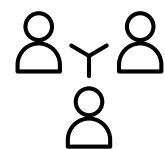

About Us

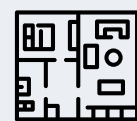

Our Credentials & Experience

Our Services

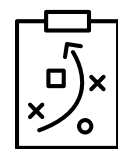

Strategic Space Planning

Our space planners deliver expert real estate and spatial planning, crafting flexible, tailored solutions that optimise efficiency and enhance wellbeing. Combining best practices with innovative design, we create adaptable, compliant plans using new or repurposed assets.

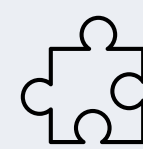

Interior Design

Our designers craft innovative, inclusive, and environmentally positive solutions, prioritising wellbeing and neurodiversity. With expertise in materials, colour, biophilia, and lighting, they create inspiring, bespoke environments tailored to each client and location across Cat A and B sectors.

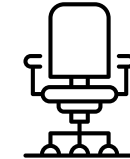

Technical Design

Our technical designers ensure accuracy, develop proposals within scope and budget, and coordinate seamlessly with contractors while preserving design intent. They uphold quality benchmarks during construction and consolidate final designs with record documents upon project completion.

Fit-Out

We provide a turnkey fit-out solution, managing everything from design to construction in-house. Our team collaborates closely with clients to create inspiring spaces that optimise their property – on time and within budget.

Furniture Specification

We know a great workplace needs furniture that looks good and works hard. Our in-house team carefully curates stylish, functional pieces, integrating with your team to understand your needs. From briefing to showroom visits and aftercare, we handle it all.

Project Management

Our Project Managers ensure timely, on-budget delivery through clear communication, strong organisation, and strict deadline management. They bridge our design team and contractors, guaranteeing quality through keen attention to detail.

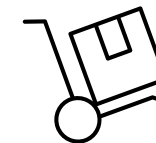

Graphic Design

Our graphic design team crafts visual concepts that enhance aesthetics and user experience. From glazing manifestations to wayfinding, signage to artwork, we create innovative, brand-driven solutions that inspire, inform, and reinforce business identity.

Off-Site Asset Storage

A workspace relocation often leaves surplus furniture and office materials. To help, we offer secure warehouse storage, available for hire. Items are safely stored and can be returned with just a few days' notice.

Small Works

We take pride in supporting our clients' everyday needs, no matter the project size. Our dedicated small works team delivers the same professionalism and attention to detail as with larger projects. We offer a responsive service with the high standards and support you expect.

Workplace Consultancy

Workplace Consultancy is a data-driven approach to optimising your workspace. By analysing how your business uses its space, we identify ways to enhance productivity, wellbeing, and engagement. We work closely with you to understand your goals and create a workplace that truly supports them.

Working With Us

Consultative & Detail Driven

- We are thorough in every aspect of our approach to your project
- We work in a consultative approach to really understand your challenges and work with you to achieve the best solution
- We will challenge the opportunity to maximise efficiencies and effectiveness of every aspect of the scope
- Our attention to detail ensures your positive experience
- We are design driven, striving for greater things, promoting flexibility and adaptability unique to you and your business

Ownership

- We take full responsibility for your design, ensuring your vision is protected and delivered through every stage of the project.
- Our priority is to validate and enhance your opportunity whilst protecting design integrity
- We take responsibility for delivering your vision
- CDM 2015 - Workplace Creations will undertake the roles of both Principal Designer and Principal Contractors, taking full ownership of the project managing risks and maintaining the highest Health & Safety standards

Long Term Partner

- We build long-lasting client relationships through trust, open communication and collaboration
- Our support goes far beyond the completion of this project as we become you trusted workplace partner
- We are proud of multiple client and partner relationships spanning over a decade
- We are a part of your team, a trusted partner

Financial Health

- We're proud of 20+ years of operation with an average year on year increase in turnover of 15%
- On request we are happy to provide our past 3 years' Accounts for your review for confidence in our financial standing
- We are open and transparent, providing competitive pricing to validate our costs to ensure the client maximises value
- We're proud to hold a Dunn & Bradstreet Rating of 2A

Proven Track Record

- We have delivered multiple Core Works projects up to £500k, as well as large scale phased projects in the £1m to £10m range
- We understand the intricacies required to successfully deliver complex projects whilst achieving maximum efficiencies
- We provide continuous reporting, liaising with your on-site team daily
- Contractor of the Year, London Construction Awards 2025 Winner
- Mixology23 Winner - Project of the Year, Public Sector and Cultural

Nationwide Capability

Our design, consultancy and delivery expertise continues to take us across the UK and Ireland.

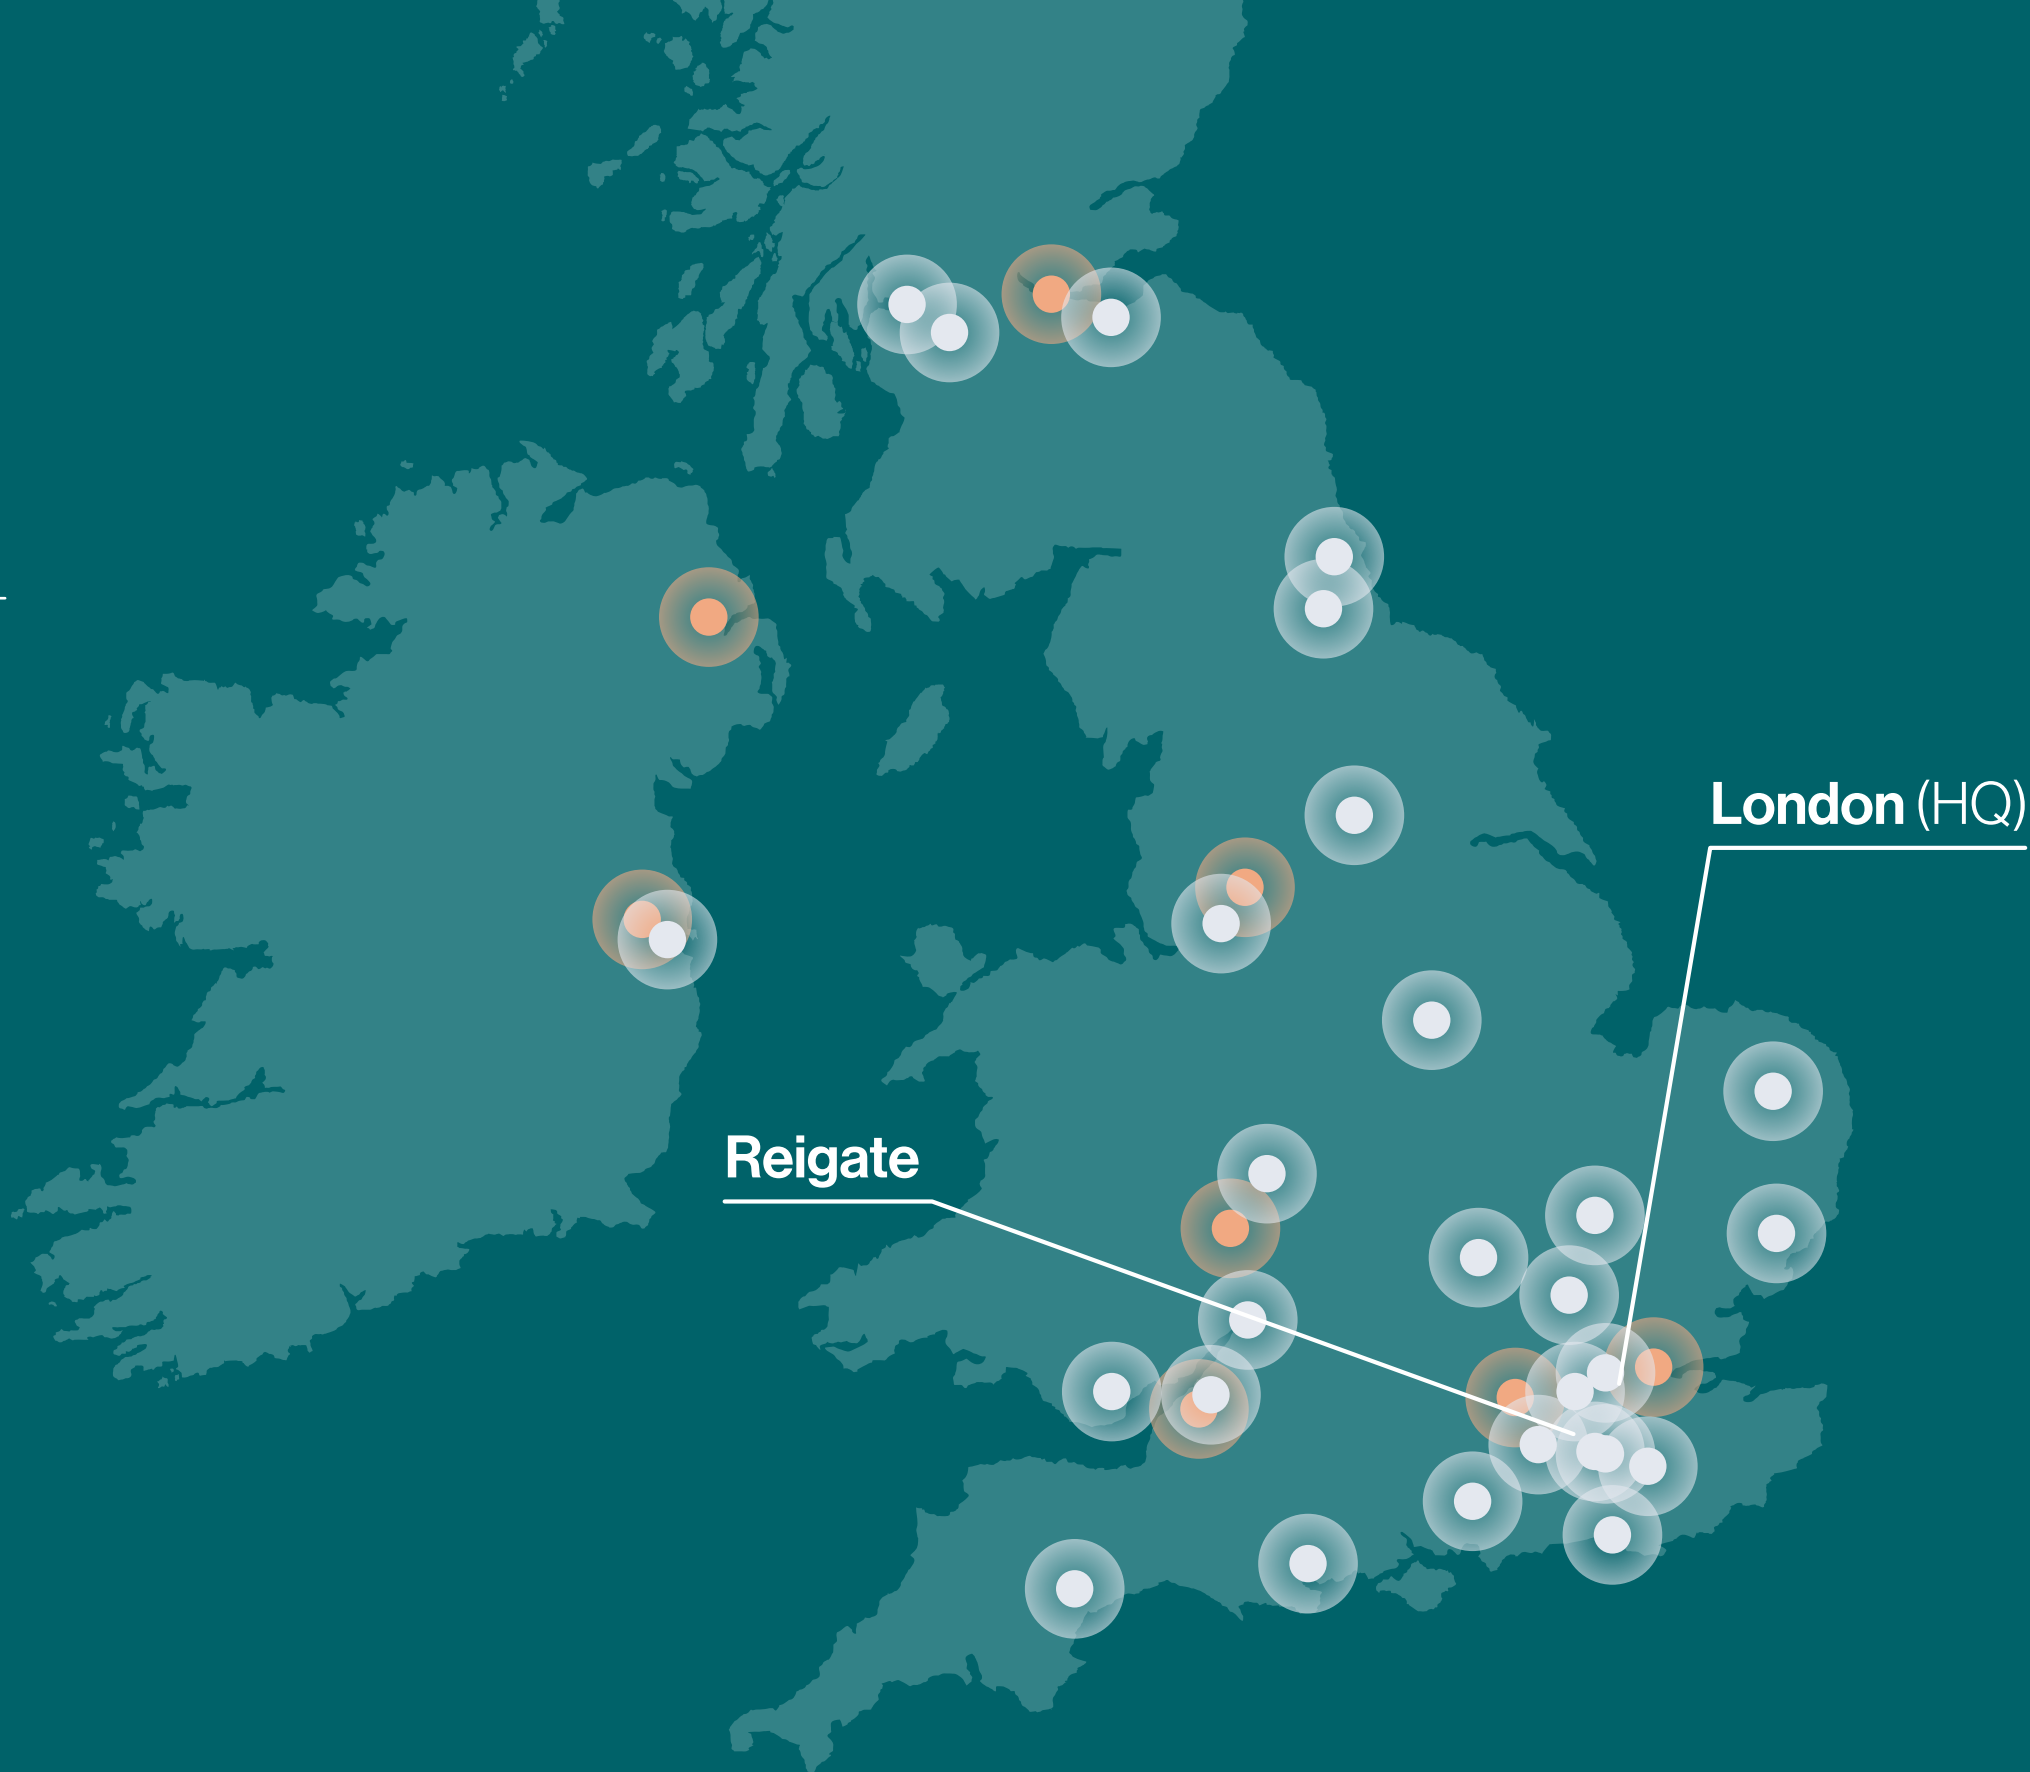

Based in London, with a regional office in Reigate supporting projects across the South of England, we are well placed to deliver for clients wherever their workplace needs take them.

Sustainability Overview

We specialise in delivering sustainable office fit outs that balance performance, design integrity and environmental responsibility. Sustainability is embedded in every stage of our process, from concept to completion.

We're experienced in delivering spaces aligned with the UK's leading frameworks (including BREEAM, SKA Rating, WELL and Fitwel) whether through full certification or by applying key principles to meet client ESG goals.

Our teams work collaboratively to reduce embodied carbon, specify responsibly sourced materials, and create healthy, future-focused workplaces built to last. For us, sustainability isn't a separate agenda. It's simply how we build better spaces.

Design

- Sustainable materials, responsible sourcing, inclusive environments

Team and culture

- Internal learning, team-wide input & clear sustainability goals

Site Delivery

- Waste management, energy & water tracking, air quality focus

Ongoing impact

- Aftercare, commissioning, & post-handover monitoring

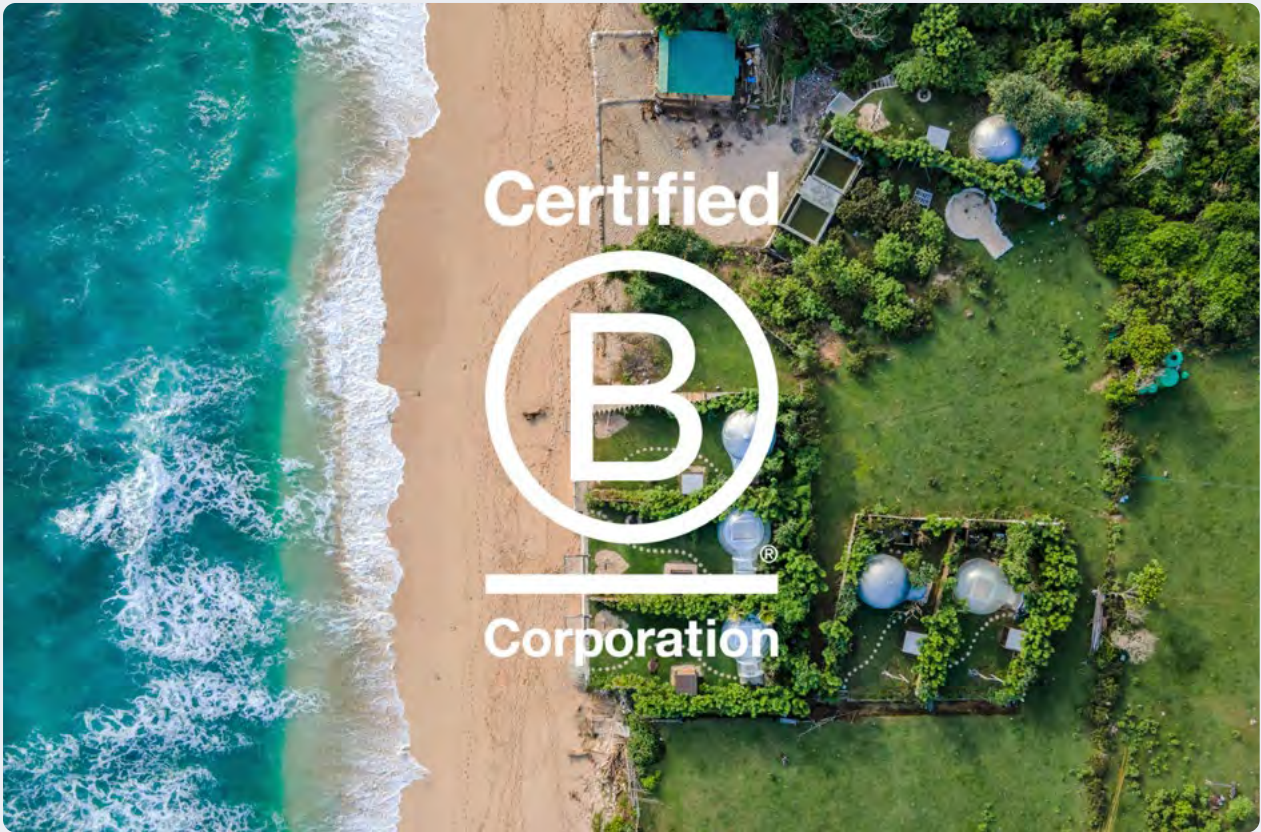

Carbon tracking

- EPCs, DSM, embodied carbon reviews & industry benchmarking

We work in partnership with Alphacello, a leading sustainability consultancy and certified B Corp, to integrate accreditations, reporting, modelling and training into our delivery model. Their expertise supports everything from EPCs and IES to LCA, NABERS and BREEAM.

Maintaining an independent consultancy relationship ensures rigour, transparency and accountability. By keeping this input external, we safeguard the objectivity of our reporting and allow space for informed challenge where it matters most.

ESG Policy

Sustainability is a core principle that informs every stage of our work. We design and deliver high-performing spaces that are functional, beautiful and built for the future.

Our approach is guided by our Environmental, Social and Governance (ESG) commitments ensuring we operate responsibly, support people and communities, and minimise our environmental impact. To focus our efforts and drive meaningful progress, we've identified four key themes that shape this policy and guide how we work.

People

A human-centric approach is key to what we do. We focus on building long-lasting relationships with everyone involved in our work. Our commitment to Diversity, Equity, Inclusion, and Health and Safety in line with ISO45001 ensures a safe, inclusive environment. Our bespoke services and authentic approach create added value at every opportunity.

Responsible Trading

We endeavour to have a wider impact. Our Code of Conduct mandates suppliers to adhere to our values on risk, impact, and social value. We prioritise compliance with Information Security, Bribery, and Anti-Slavery standards. The Workplace Creations team has the skills and experience to deliver maximum value in all projects.

Community

Designing for a better human experience. We prioritise communities in our business impact considerations. Beyond minimising noise and pollution, we promote local suppliers and engage community members in our workforce. We also support local charities through donations, fundraising, and resources that create a positive difference.

Environment

Sustainability-led Solutions drive our success. Our ISO 14001 certification drives us to integrate environmental practices into our operations. We implement circular economy waste initiatives and conduct Carbon Footprint analysis to achieve our goal of becoming a market leader in real Net Zero.

Our Ethos

As a committed and responsible organisation, we believe in creating high performing spaces that are not only beautiful and functional, but also sustainable and designed for the future.

Our ISO 14001 management system and certification reflects our commitment to environmental responsibility. We minimise our carbon footprint through sustainable design, sourcing, and waste prevention. Innovative processes ensure sustainability is ingrained in everything we do, from the design phase to minimising negative impacts.

Our sustainability approach provides the foundation and pathway for our ambitions, objectives, and future. We believe that sustainability must be inextricably woven into our core business model.

In addition to our ESG policy, we are committed to fulfilling compliance obligations, preventing pollution, and protecting and promoting the environment as part of the work we do.

Environmental Management

The development of our EMS has included a full and comprehensive materiality assessment, which has given rise to policy and the establishment of meaningful objectives, targets, and plans.

Engagement

All staff are actively involved in developing and implementing our objectives and what they need to do to support our environmental policy.

Environmental Steering

Our designated Environmental Group ensures there is robust governance in place to effectively implement this policy and measure progress against set targets to drive continual improvement.
