TOPAZ Technology Group

Design-led technology solutions for the modern workplace

With over 20 years of experience, TOPAZ Technology Group delivers high-quality, future-ready technology solutions for organisations across the UK and internationally.

The technology landscape continues to evolve at pace. Our role is to help organisations navigate that change - designing, deploying, and supporting intelligent systems that enhance communication, collaboration, and user experience.

Our vision is to be recognised as a trusted industry leader across audio-visual systems integration, unified communications, digital signage, and workplace technology.

Operating through specialist divisions, TOPAZ provides a fully integrated, end-to-end service - combining design expertise, technical excellence, and long-term support to deliver reliable, scalable solutions for any environment.
From initial consultation to ongoing maintenance, our experienced project managers, engineers, and developers work as an extension of your team - ensuring every solution is delivered seamlessly on time and to specification.

OUR DIVISIONS

Digital Signage

As an OEM manufacturer, we design and deliver advanced digital signage solutions with market-leading features - helping organisations communicate more effectively and create impact at scale.

Audio-Visual Solutions

Our AV division partners with world-leading manufacturers to deliver high-performance systems for meeting rooms, collaboration spaces, and complex enterprise environments - installed and supported to the highest professional standards.

What we do...

TOPAZ delivers the full lifecycle of workplace technology projects - from strategy and design through to installation, commissioning, and long-term support.

We specialise in transforming workplaces into connected, high-performing environments that are intuitive to use and built for long-term reliability.

Core Sectors We Support:

- Commercial real estate
- Flexible workspaces
- Landlords and developers
- Corporate and enterprise environments

Recognised for our consultative approach, technical expertise, and dependable delivery model, we provide solutions that enhance connectivity, improve operational efficiency, and elevate the user experience across every space.

Our Methodology

Our proven delivery methodology ensures consistency, quality, and accountability at every stage of a project.

1. Consultation & Discovery
We begin by understanding your objectives, operational requirements, and user needs -assessing each space to inform the optimal technical approach.

2. Solution Design
Our design team develops tailored, scalable solutions aligned to your environment, workflows, and future growth.

3. Technology Selection
As a vendor-agnostic provider, we select best-fit technologies from trusted global manufacturers - prioritising performance, longevity, and value.

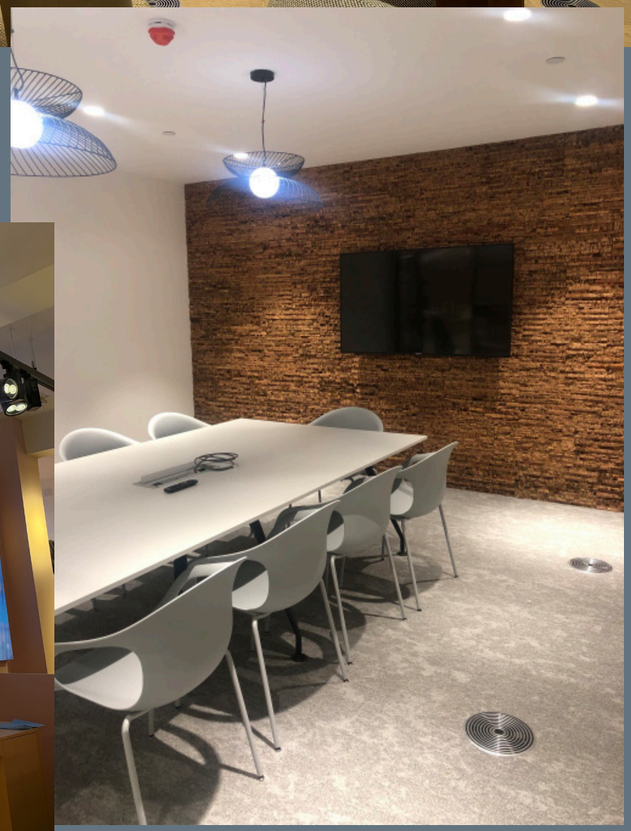

4. Installation & Commissioning
Our certified engineers deliver precise, professional installations - ensuring systems are fully optimised, tested, and ready for use.

5. Integration & Connectivity
We integrate seamlessly with leading collaboration platforms, ensuring intuitive operation and simplified user journeys.

6. Training & Handover
Clear documentation and tailored training ensure confident adoption from day one.

7. Ongoing Support
Our service and maintenance offerings protect your investment through proactive monitoring, rapid response, and long-term support.
