Design, deliver and maintain AV spaces that perform flawlessly — every time.

SPOR MISSION

REAL PEOPLE. REAL RESULTS. NO CORPORATE FLUFF.

wearespor.com

WHO WE ARE

Connected spaces, built to to perform.

SPOR designs, delivers and maintains the technology that makes a building work — meeting rooms that start on time, spaces that adapt to how people meet, and environments that leave an impression. We treat technology as part of the building, coordinated with the fabric and services around it, not bolted on at the end.

We exist to remove risk from workplace technology. We've delivered global projects and built a structured lifecycle model to prevent the failures most organisations experience. We don't disappear after install — we manage performance over time.

CONSTRUCTION FIRST

SPOR is built to operate inside construction programmes. We coordinate with main contractors, fit-out specialists and M&E teams from first-fix containment to practical completion — attending site meetings, issuing shop drawings and holding our own critical milestones. CAT A and CAT B, phased handovers, FAT and SAT, snagging, O&M manuals and soft landings are routine, not exceptions.

What we deliver

Six connected disciplines, coordinated by one team.

WORKPLACE TECHNOLOGY

Meeting rooms, boardrooms, Microsoft Teams Rooms, collaboration & wireless presentation.

EXPERIENTIAL

Immersive LED, brand experiences, interactive displays, reception & experience centres.

DIGITAL COMMS

Digital signage, wayfinding, IPTV, CMS platforms, room booking & messaging.

AUDIO & PERFORMANCE

Auditoriums, town halls, training & broadcast spaces, performance audio.

CONTROL & INTEGRATION

Control systems, DSP, cameras, streaming, recording & large-format LED.

EXPERIENCE, NOT INSTALLATIONS

SPOR delivers workplace technology experience — not just installations — managing performance long after handover.

The 5-pillar workplace technology model

Technology is not a one-time event — it is a managed system.

01

Design

Specified early and coordinated with the building — never bolted on late.

02

Integration

Delivered flawlessly and aligned with IT, fit-out and M&E.

03

User adoption

Enablement and support so people actually use the rooms with confidence.

04

Asset & warranty

Assets, firm ware and warranties tracked in **SPORTrack**.

05

Proactive monitoring monitoring

Live estate monitoring in **SPORTrack Pro** — issues caught before disruption.

DELIVERY & SUPPORT

From programme to soft landing

Design and shop drawings to consultant standards, coordinated in BIM. Racks are built, staged and witness-tested offsite, then proven room-by-room through FAT and SAT before demonstrations, training, handover and O&M documentation. A named, consistent team owns your project from design through commissioning to warranty — with a single point of accountability throughout. We mobilise immediately on award, and where specialist subcontractors are engaged they work to our standards and management.

Beyond handover

Support does not stop at practical completion. Technology is a critical business tool — we keep it working.

MANAGED SERVICES

SPORTrack

Remote monitoring, preventative maintenance, asset & firmware management and reporting.

SPORtal

User enablement — digital user guides, QR-code room help and a consistent, better experience in every room.

Service & SLA

100% UK-based desk, 08:00–18:00 cover, remote & on-site response, P1–P4, warranty admin.

Why SPOR

Construction-aware

Work to a programme, not around it.

Mobilise on award

On site and moving from day one.

Named, consistent team

The same faces, design to warranty.

Single accountability

One team owns the whole outcome.

Full transparency

Open reporting, no surprises.

Fit-out experience

CAT A / CAT B, legal to corporate.

UK-wide delivery

Maidenhead & Southport, nationwide.

SafeContractor approved

Audited health, safety & compliance.

Delivered where it counts

250+

Rooms deployed across global rollouts

40+

Global projects & multi-floor HQs

98%

Uptime SLA on live estate monitoring

£1m+

Single programmes managed end-to-end

"Outstanding AV vendor — meticulous, knowledgeable, and endlessly accommodating, ensuring exceptional installation, service, and support."
